WHEN: SATURDAY Feb. 16th

TIME: 10:45am-1:15pm (we will start on time with a grand intro.)

WHERE: Baltimore Convention Center, Room 307 & 308

COST: FREE

WHAT IS IT: "*Family Technology Summit*" by Mario - a cool technology event and show that encourages youth and minorities to pursue Science, Technology, Engineering and Math (STEM) academics and careers. Produced and developed by Radio and TV tech-media personality Mario Armstrong. This event is interactive and audience engaging with cool tech demonstrations. Showcasing hot, new technologies and devices, featuring young and inspiring industry guest speakers, and discussing new career opportunities like the video game industry. This high-energy, educational and entertaining event attracts youth, commands their attention and infuses them with the excitement, energy and roadmap to be a success in the technology industry. Parents don't miss out on an opportunity to have your middle or high school child's life changed. Heck, even you will learn a few things on how your kids can harness their passions and creativity and put it to solid use in the technology industry. You'll be amazed at the hot new trends, educational opportunities and career options, all while being entertained and inspired.

The event is full of interaction, music, education & inspiration. AND IT'S FREE to the public.

This year's 10th annual Black Family Technology Awareness Week Summit (www.blackfamilynet.net) at the Baltimore Convention Center is one of the many facets of Career Communications Group's commitment to minorities in Science Technology Engineering and Math. The breadth of CCG's commitment can be seen at the 22nd annual BEYA STEM Global Competitiveness conference (www.BEYA.org)
